🌐 <https://github.com/krialm>

I am a dedicated and passionate student at Vilnius Tech, with a wide range of different skills and specialising in data science and machine learning. I am writing to express my interest in joining your data science team and contributing my skills and knowledge to solve complex problems and drive data-driven insights.

Experience

Junior Data Scientist

June 2022 - August 2022

During this period, I gained valuable hands-on experience as a Junior Data Scientist at Kervan Ambalaj. My role involved working on various aspects of data science, including machine learning engineering, data analysis, database structure, and Python development. I contributed to projects that enhanced the company's data-driven decision-making processes and improved operational efficiency.

Developer of a computer vision solution for the university project

September 2023 - present

I am currently spearheading a university machine learning project with the objective of employing computer vision and a neural network to assess the quality of a grain ear. The primary goal is to leverage advanced technologies to enhance the precision and efficiency of grain quality evaluation.

Languages

- English C1 (Advanced)
- Russian C2 (native)
- Ukrainian C2 (native)
- Turkish A2 (Pre-intermediate)

Education

High School

Vilnius Gediminas Technical University

- Bachelor of Applied Artificial Intelligence

Skills

- Python
- C++
- Scikit-learn
- TensorFlow
- OpenCV
- Matplotlib
- Pandas
- Numpy
- Seaborn
- SQL(MySQL)
- AWS and AZURE
